Good afternoon all St. Louis County City and Township Representatives,

The St. Louis County Multi-Hazard Mitigation Plan draft document is ready for public review and comment until Friday, January 31st. City and Township personnel are encouraged to look at the plan and submit any questions, comments, or changes for the plan so we can submit everything to the State of MN and FEMA.

Action Items for City/Township Representatives:

1. **REVIEW and COMMENT** on the Multi-Hazard Mitigation plan at this website: <https://sites.google.com/d.umn.edu/stlouiscounty/home> - in particular the mitigation actions for your jurisdiction, and then fill out the online form (click on the words "quick form" to access and complete).

2. **POST THE NEWS RELEASE** (attached) **and SEND PROOF OF POSTING** to help announce the public review period.

This could be a bulletin board photograph, website link, Facebook page – whatever method you used to get the word out.

Once you post the News Release, please send proof of posting to Holly Olson at olsonh@stlouiscountymn.gov.

This is an essential part in proving to FEMA that we have provided opportunity for public review of the plan.

Many thanks for all of the input and assistance you have given during this process.

Please contact me with any questions.

Public comment sought for county's Multi-Hazard Mitigation Plan

St. Louis County has completed an updated draft of its Multi-Hazard Mitigation Plan (MHMP) and is now seeking public feedback on it. Citizens can find a link to review the plan and offer feedback by visiting z.umn.edu/stlouishmp. The review and comment period is open through Friday, January 31, 2020. After that, the county will submit the draft plan to the State of Minnesota and the Federal Emergency Management Agency (FEMA) for review.

The St. Louis County MHMP is a multi-jurisdictional plan that covers St. Louis County, including the cities of Aurora, Babbitt, Biwabik, Brookston, Buhl, Chisholm, Cook, Duluth, Ely, Eveleth, Floodwood, Gilbert, Hermantown, Hibbing, Hoyt Lakes, Iron Junction, Kinney, Leonidas, McKinley, Meadowlands, Mountain Iron, Orr, Proctor, Rice Lake, Tower, Virginia, and Winton. The plan incorporates the concerns and needs of townships, school districts, and other participating stakeholders.

St. Louis County is vulnerable to a variety of potential natural disasters, which threaten the loss of life and property in the county. The plan addresses how to mitigate against hazards such as tornadoes, flooding, coastal storms and erosion, wildfires, blizzards, straight-line winds, ice storms, and droughts which have the potential for inflicting vast economic loss and personal hardship.

Update of the plan has been under direction of St. Louis County Emergency Management in cooperation with U-Spatial at the University of Minnesota Duluth and representatives from County departments, city and township governments, school districts, and other key stakeholders. Together, the planning team worked to identify cost-effective and sustainable actions to reduce or eliminate the long-term risk to human life or property from natural hazards. Some examples include improvement of roads and culverts that experience repetitive flooding; construction of safe rooms at campgrounds, public parks, mobile home parks or schools to protect lives in the event of tornadoes or severe wind events; burying power lines that may fail due to heavy snow, ice or wind storms; ensuring timely emergency communication to the public through warning sirens and mass notification systems, and conducting public awareness and education campaigns to help people be prepared to take safe action before, during, or following a hazard event.

Hazard mitigation planning helps St. Louis County and other jurisdictions protect their residents. Working with local communities through the process helps identify vulnerabilities and develop strategies to reduce or eliminate the effects of a potential hazard. In addition, increasing public awareness of local hazards and disaster preparedness helps to create a community that is resilient to disaster, and breaks the cycle of response and recovery. Updating the plan further allows the County and its jurisdictions to apply for eligible projects under future Hazard Mitigation Assistance (HMA) grant funding from FEMA for projects that are cost-effective and will help to reduce or eliminate impacts of future natural disaster events.
